

Canfigure can effectively operate as a **Computerized Maintenance Management System** (CMMS) by utilizing the Asset Management module and mobile app. Included is the ability to define any kind of asset and track its life-cycle with full maintenance history and work order management. An asset maintenance schedule can be defined with automated reminders and optionally trigger specific workflows.

Inventory and spare parts can be tracked including barcode scanning and label generation.

Users can check-in and check-out assets such as tools or computer equipment.

The mobile app provides remote access to perform most asset management functions including raising work orders and attaching photos.

Financial information can be recorded including depreciation & related reports.

Canfigure CMMS key features:

- ✓ Any asset type
- ✓ Easy customization
- ✓ Inventory / stock control
- ✓ Customer management
- ✓ Contract management
- ✓ Preventive maintenance
- ✓ Maintenance schedules
- ✓ Work Orders
- ✓ Barcode scanning
- ✓ Asset depreciation
- ✓ Mobile app
- ✓ Excel conversion

Canfigure is a 100% web-based application that can be installed on your internal network, or accessed via our secure cloud infrastructure. Visit www.canfigure.net for more information and to register your interest!
