

The Canfigure Test Validation Module provides everything required to manage the end-to-end process of planning, testing and validating products. Support for Environmental and Electromagnetic Compatibility (EMC) testing is built-in, ensuring you meet compliance regulation requirements. Functions include complete test scheduling, D8 defect management and DVP reporting.

Work-flow processes include ship and return of equipment to external vendors, and the storage and retrieval of parts from the warehouse.

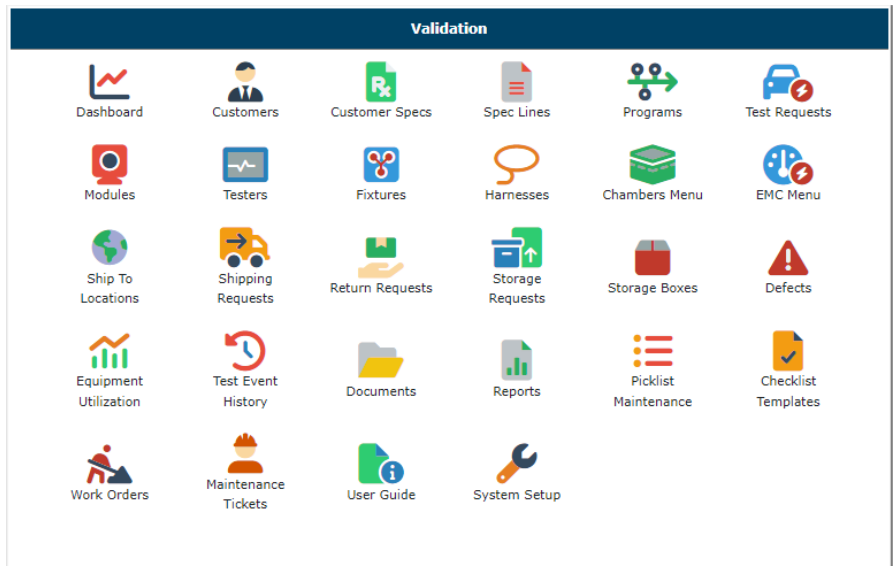

Equipment used for tests can be booked and reserved, along with the systems involved in the testing process.

Detailed DVP&R reports can be produced that are customer ready.

Comprehensive KPIs track planned vs. actual.

### Test & Validation key features:

- ✓ Customer Management
- ✓ Test Scheduling
- ✓ Storage process
- ✓ Program Management
- ✓ D8 Defect Management
- ✓ Test Checklists
- ✓ Specification Definition
- ✓ DVP & Test Reporting
- ✓ EMC Compliance
- ✓ Equipment Calibration
- ✓ Ship & Return process
- ✓ KPI Dashboards
